

DVM Previous Year Question Paper

SEMESTER END EXAMINATION - DATA VISUALIZATION AND MODELING (2025)

Time: 3 Hours | Total Marks: 80

SECTION A (Attempt Any Two):

Q1. (a) State and explain the Central Limit Theorem. Discuss its importance in sampling distribution analysis and statistical data visualization. [10 Marks]

Q1. (b) What are Q-Q plots? Explain how they are used to verify the normality assumption produced by the Central Limit Theorem. [10 Marks]

SECTION B:

Q2. (a) Differentiate between Bar Charts, Histograms, and Box Plots for exploratory data analysis. [10 Marks]

Q2. (b) Explain visual encodings and perceptual principles formulated by Edward Tufte. [10 Marks]
