

Machine Learning Mid-Sem Question Paper

MID SEMESTER EXAMINATION - MACHINE LEARNING

Total Marks: 50 | Duration: 2 Hours

- Q1. Derive the cost function for linear regression and explain gradient descent convergence. [10 Marks]
- Q2. Explain the bias-variance tradeoff and describe how L1 Lasso and L2 Ridge regularization prevent model overfitting. [10 Marks]
- Q3. Differentiate supervised learning, unsupervised learning, and reinforcement learning. [10 Marks]
