

Data Visualization & Modeling Course Syllabus

CURRICULUM SYLLABUS - DATA VISUALIZATION AND MODELING

Unit 1: Descriptive Statistics and Sampling Distributions. Central Limit Theorem, normal distributions, standard error, confidence intervals.

Unit 2: Exploratory Data Analysis & Visual Encoding. Color theory, chart selection, Matplotlib and Seaborn visualization libraries.

Unit 3: Regression and Predictive Data Modeling. Correlation, residual plots, evaluation metrics.

Assessment: Mid-Semester Test (30%), Practical Assignments (20%), End-Semester Exam (50%).
